 _____ (or stamp)

PROJECT SPECIFICATIONS

New building Old building, renovation planned, planned start of construction: _____
 Planned date for heating installation: _____

Components

- Energy certificate appended
 Heat requirement as per EN 12831 or cooling requirement as per VDI 2078/VDI 6007 appended
 U-value or description of the following components:
- Outside wall to air: _____
 - Outside wall to ground: _____
 - Floor to ground: _____
 - Floor to unheated rooms: _____
 - Floor to outside air: _____
 - Roof: _____
 - Ceiling to unheated rooms: _____
 - Inner wall: _____
 - Windows, doors: _____
 - Roof surface windows: _____
- or assumed heating requirement to be used in our calculation: _____ W/m²

Cellar areas

to be heated: _____

 unheated

Bathroom

Cover residual heating requirement (if present):
 Radiators: 2-pipe Low temperature
 Wall heating system
 Miscellaneous: _____

Controlled ventilation system

Yes No Heat recovery: _____ %

Heat generation

Heat pump Remote heating Wood
 Gas Pellets Solar Oil
 Max. output of heat generator: _____ kW

Maximum flow temperature – heating

You wish to specify: _____ °C
 Recommendation from Variotherm

Refrigeration

Heat pump Well water: _____ °C
 Miscellaneous: _____

Maximum flow temperature – cooling

You wish to specify: _____ °C
 Recommendation from Variotherm
